

ANNUAL SUMMIT

Interdisciplinary Approach in Concussion Management with Treatment Strategies

BANNER CONCUSSION CENTER - PHOENIX, AZ

January 22nd & 23rd, 2016

REGISTER TODAY!

What is Vision Therapy?

What kind of role does stress play in recovery from concussion?

How soon is it safe to start exercises to treat dizziness with concussion recovery?

What role do I play in helping a student return to school after a concussion?

When do I refer to an audiologist?

How does nutrition affect brain health?

Can you expect visual disturbance with every concussion?

In terms of diagnosis, what is the difference between concussion and post-concussion?

GET YOUR QUESTIONS ANSWERED

Summit Description & Objectives

This two day course will focus on the evaluation and treatment management of concussion from several different clinical perspectives. The presentations will emphasize a team approach to evaluating this diagnosis, including both lectures and labs to provide a greater understanding of the tools and treatment techniques used by different disciplines. Participants from all disciplines (physicians, physical therapists, occupational therapists, athletic trainers, etc.) are welcome.

Objectives:

- Understand the physician perspective on evaluation and treatment of concussion versus post-concussion syndrome
- Identify and understand the role of the physician in medication management of post-concussion syndrome including neuropsychiatric symptoms, physical symptoms, cognitive symptoms and sleep disturbance
- Define the role of neuro-optometry in the multi-disciplinary approach to concussion management
- Recognize visual deficits related to concussion and demonstrate appropriate treatment strategies for functional visual retraining
- Discuss evidence based practices on return to play progression models from an athletic trainer's perspective
- Utilize evidence based practice on the evaluation and treatment of vestibular disorders related to mTBI
- Understand the use of audiology and when to utilize this service from both a physician and therapist perspective
- Identify and demonstrate appropriate treatment strategies for dizziness and balance deficits related to mTBI
- Define how education is defining best practices for cognitive rest, academic accommodations and return to learn after concussion
- Define the role of nutritional assessment and management with mTBI

Summit Agenda

Day 1: Friday, January 22nd

Lecture Series

8:00am – 8:45am	Registration
8:45am – 9:00am	Welcome & Introduction
9:00am – 10:00am	Diagnosis of concussion, pathophysiology, evaluation from physician perspective Steven Erickson, MD, FACP
